

ANKOM DUAL LEAD RECHARGEABLE BATTERY KIT (Part #: RF43)

The Dual Lead Rechargeable Battery Kit, designed for use with the ANKOM RF Gas Production System, allows the user to connect the dual lead battery to both the module and charger while the module is in use.

- Place the battery in the module and connect one lead to the module. Connect the other lead to the charger with the 3 ft. extension cable.
- The user can now charge the battery when voltage gets low without removing the battery from the module, or keep the charger connected to the battery for continuous charging throughout the test.
- The Dual Lead Rechargeable Battery Kit (Part #: RF43) includes:
 - Dual Lead Rechargeable Battery (Part #: RF46)
 - RF Module Housing Cap (Modified) (Part #: 7069)
 - 3 ft. Extension Cable (Other lengths available upon request) (Part #: RF44)
