

Filling Reservoir Bottles

FLEX

Service Procedure 005

Revised: 10/26/2020

Fill each solution reservoir bottle with the appropriate reagents, refer to Appendix A.

To fill a vented reservoir bottle (#1 or 3):

1. Unscrew the reservoir bottle cap without removing the tube inside the solution reservoir bottle.

2. Place a funnel into the reservoir bottle.

3. Slowly pour the appropriate solution into the funnel to fill the reservoir bottle.
