

Be sure to remove all shipping packaging from inside the columns before installing into the instrument.

1. **Wipe the inside of the SPE column top with a wetted paper towel (water) to remove sorbent dust before installing each column onto the instrument.**

2. **Install the SPE columns.**

- a. Place the top of the column over the column top adapter.
- b. Push the column upward and guide the bottom of the column to the back until it hits the guide.
- c. Set the column in the column bottom adapter on the instrument.
- d. Twist each column a quarter turn clockwise (to the left).
